This ECI proposes to exempt from the measurement of each country's public deficit, that part of Government spending for education that is lower than the last 5-year Eurozone average.
- combating inequality by providing equal opportunities for education and training to all young people in Europe
- ensuring adequate and appropriate infrastructures and tools for high quality education in times of crisis
- enhancing and safeguarding growth, development & democratic institutions;
- ensuring the employability of younger generations through investment in education.
- supporting the European policy Horizon 2020
Why did we focus on education?
More than 5% cuts

Greece,
Italy,
Cyprus,
Latvia,
Lithuania,
Hungary,
Portugal,
Romania,
the United Kingdom (Wales) and Croatia
Cuts between 1 and 5 %

French Community of Belgium,
Bulgaria,
the Czech Republic,
Estonia,
Ireland,
Spain,
France,
Poland,
Slovenia,
Slovakia and
the United Kingdom – Scotland
Why now?
Where will the funds come from?
GDP across all OECD countries shrank by 3.8% (2009), growth in labour income among people with higher education contributed nearly 0.4% to the GDP of these countries.

In contrast, the contraction of labour income that year among people with a medium level of education reduced the GDP by 0.8%, while shrinking incomes among people with lower levels of education trimmed another 0.5% of GDP.
